

#### Key Override

Any of the CL200 functions may be ordered with key override. Locks may be keyed alike if required.

#### CL210 CL210 Mortise Deadbolt

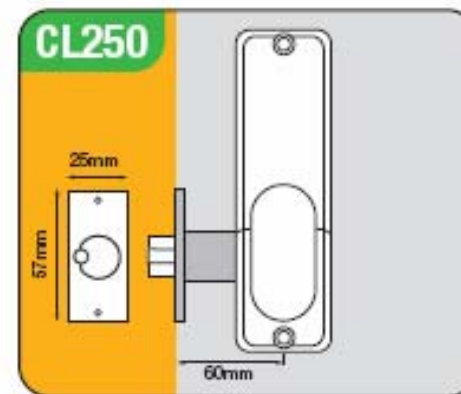

NOT ILLUSTRATED

Sizes as 250. Bolt extends 25mm beyond door edge when locked.

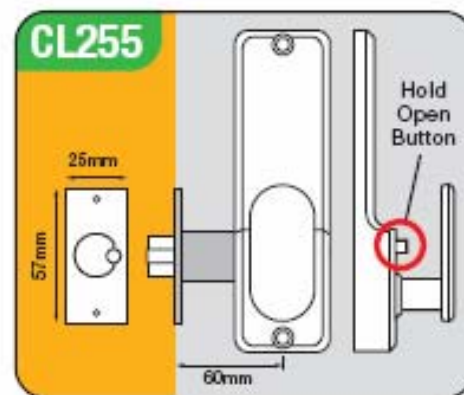

#### CL200 Surface Deadbolt

Bolt slides on inside surface to lock or unlock. Bolt is moved manually by means of the outside knob after code input and freely by the inside knob at all times. A mortise keeper plate is provided.

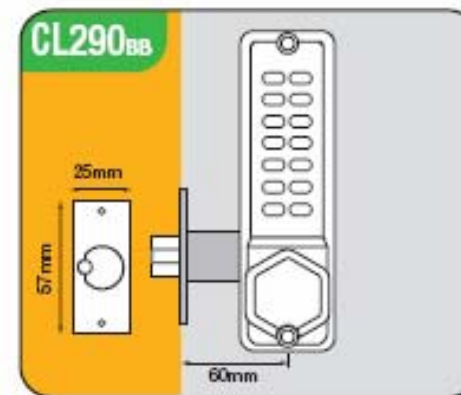

#### CL250 Mortise Latch

Latch is spring loaded and will lock automatically when the door is closed. The latch bolt has a deadlocking plunger feature to prevent unlawful shimming of the latch.

#### CL255 Mortise Latch - Hold Open

Functionally the same as the 250 with the addition of a slide button which can be used to hold open the latchbolt when the lock is not required to be operational.

#### CL290BB Back to Back

The CL250 Mortise Latch may be ordered with two code plates, installed Back to Back, to provide coded access in both directions.
