The above figures assume doors with square edges, a radiussed edge will reduce the L and A minimum values

H: Mount plate heights are calculated using one of the formulae below, based on whether the door is inset, quarter, half or full overlay.

Inset: $H = -2 + K + A$

Quarter: $H = 6 + K - (D)$

Half: $H = 10 + K - (D)$

Full: $H = 15 + K - (D)$

K: Drilling distance from door edge from 3mm to 6mm

T: Door Thickness 26mm maximum with square edges

Technical Information

11mm deep metal cup, 35mm cup diameter

110° opening

Compatible with all traditional 200 series mounting plates and with all Domi® snap-on mounting plates.
