

Herkules Glass

Sliding door system for single glass doors

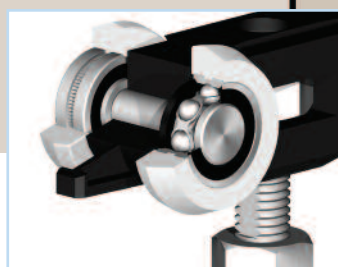

Herkules Glass

USE: Internal sliding glass door kit, for domestic or light commercial room dividers and screens

Herkules Glass is an innovative sliding door system for use with single glass doors of up to 100kg. It has a number of unique component features and no drilling or cutting of glass is necessary, making it extremely easy to install.

- Small one-piece glass clamp has unique design and is extremely easy to fit and adjust
- Clamp has settings for 8, 10 and 12mm door thickness and includes self adhesive spacers
- No need to cut or drill the glass, saving time and making installation much easier
- Aluminium pre-drilled track for a durable, long lasting finish and easy installation
- Track can be soffit/ceiling or wall mounted (wall brackets included)
- Hangers feature rollers mounted on ball bearings for extra smooth and quiet running
- Anti-jump system means wheels will always run smooth
- Clear polycarbonate bottom guide - virtually invisible when installed
- Can be used with doors made from other materials – not just glass!
- Additional door kit available without track

Wheels on ball bearings

Single sliding door
